

COMMENTS

“Meat yield, meat quality and performance in steers are the starting point. The course then neatly weaves modern breeding technology in with practical assessment of breeding stock to produce the best two-day education a cattle breeder can get in Australia.”

Bob Gaden
Former Technical Specialist Quality Beef,
NSW DPI Armidale

“The course was very practically based with live assessment work dominating. There was a high level of expertise in course coordinators and advisers with local producers bringing in animals for review and inspection.”

“Very pleased that I made time this year (finally) to attend and will recommend the course to all.”

“A lot of practical experience; taught a lot on judging scenarios and selecting for different markets.”

“The level of information was very helpful and relevant to the cattle industries. e.g. Commercial and Stud. The cattle judging was a high standard...”

“The information that was provided to us was outstanding. Having the animals right in front of you to compare and find out the differences.”

Previous Participant Comments

“The beef assessment course is a seedstock appraisal workshop with a true commercial focus. The course combines objective selection and breedplan EBV’s. I have attended the course as both a student and overjudge, and as such, learnt a great deal about seedstock and meat production. As a winner of the scholarship to Illinois I was able to fulfil my dream of furthering my knowledge of meat quality. I thoroughly recommend the course.”

Greg Chappell
Dulverton Angus, Glen Innes

PRICES AS FOLLOWS

Heifer culling class
Bull selection using performance figures
Oral comments on bull class
Evaluation and presentation

Close and Depart – 5.00pm

HISTORY

This Beef Cattle Assessment Course, now celebrating its 40th year, has been widely recognised as the most practical and hands on beef cattle selection course of its kind. It has been copied in most Australian States and NZ using the basic principles developed through experience.

The course embraces both newcomers and experienced cattle producers alike. A great deal of time and thought goes into the selection of the overjudges. They must possess the practical and communicative skills necessary to ensure all participants receive maximum benefit, given the varied levels of experience of participants.

Although this course is organised by **NSW Angus State Committee** it is open to all beef cattle enthusiasts. It utilises both Bos Taurus and Bos Indicus breeds and their crosses over the duration of the course.

The Beef Cattle Assessment course is committed to the education of its participants in all aspects of the beef industry. We strive to make it challenging but also fun.

ENROLMENT FORM
